# **BLACK FRIDAY ADS: PREVIEWING THE BIGGEST SAVINGS OF THE SEASON**

Decoding the Deals

## What Are Black Friday Ads?

Black Friday ads are promotional flyers, previews, and digital catalogs released by brands before the Black Friday sale. These ads highlight the biggest discounts, doorbusters, and limited time offers that will be available during the event. They help shoppers plan ahead, choose the right products, and set a clear shopping strategy before the sale goes live.

Black Friday ads give customers clarity about what to expect. They show early pricing, store specific deals, and product categories with the best discounts. Many shoppers use these previews to compare offers, organize budgets, and avoid impulse purchases. For retailers, these ads create excitement and attract thousands of early viewers who are ready to buy once the sale starts.
